

## CS250 Final Group Presentation

On Monday, May 9, 2016, each group is to give a final 8 minute presentation, using PowerPoint, describing their SDL Graphical Application.

► All presentation material (PPT and demo) must be in the CS250Groups folder on Grace at the beginning of class on Monday.

Here are the specifics regarding the presentation:

0. Each group member must attend and be on time. Each group member must stay for the entire class session.

Please respect your classmates: turn off your phone, log off the computer, no typing, and please ask good questions.

1. First give a complete demo of your application (no more than 2-3 minutes) so that we know what the application does and how it works.

2. Using PowerPoint, present the following:

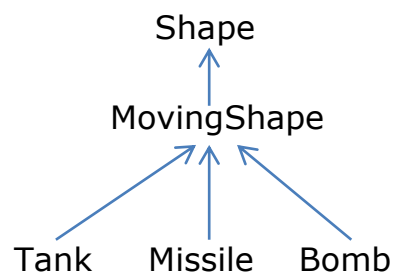

a) Visual diagram (not code) of each class showing any class composition and class inheritance

### Composition Example

Card  
- Suit  
- Denomination

Deck  
- Array of Card

### Inheritance Example

b) How did the group decide to break up the project

c) How did the group put the project together

d) Each individual member of the group is to:

- a. present the portion of the project they worked on
- b. talk about any new SDL material learned
- c. talk about the hardest part of the project

- d. talk about the most fun part of the project
- e) As a group what would you do different
- f) Time for questions
