

Setup SSH tunnel on Windows for dbeaver
using putty

Start putty

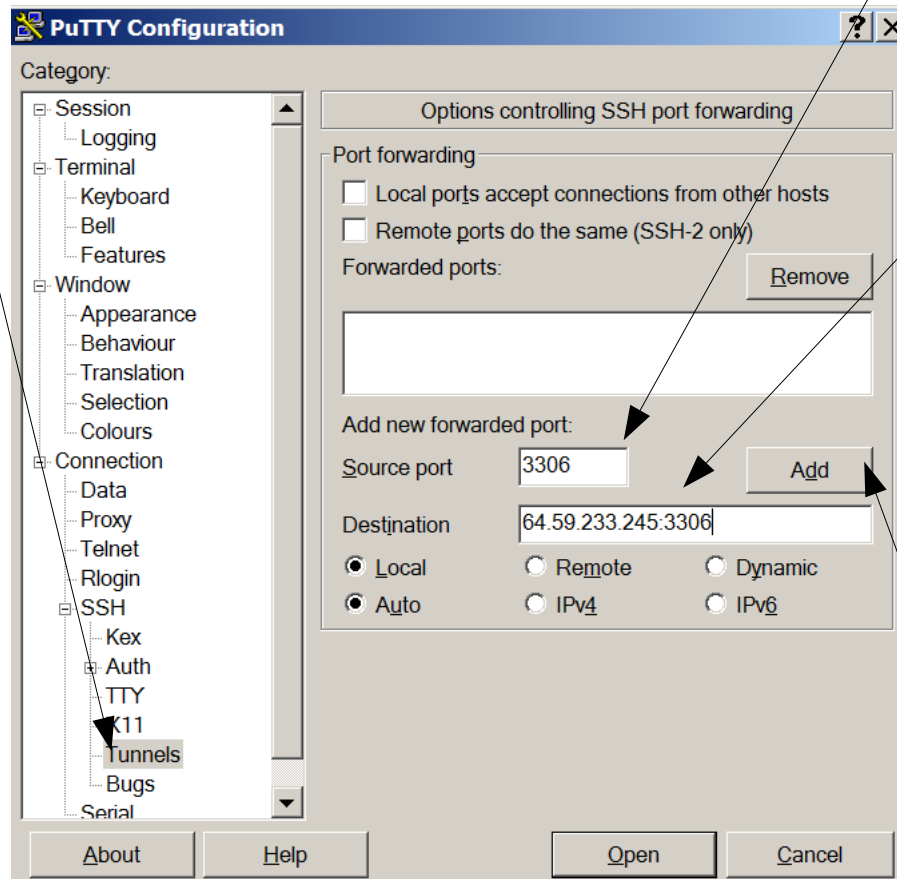

- Fill in **Host Name**
zeus.cs.pacificu.edu
- Fill in **Saved Sessions**
dbtunnel

- Choose **Tunnels**

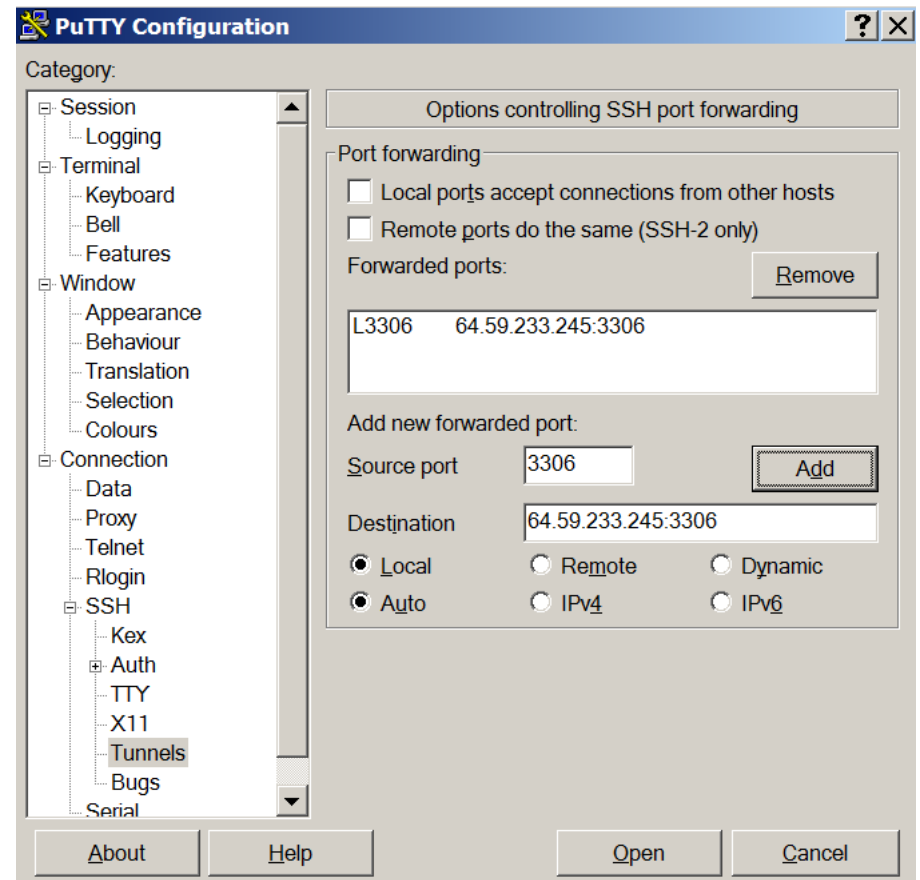

Fill in **Source port**
3306

Fill in **Destination**
64.59.233.245:3306

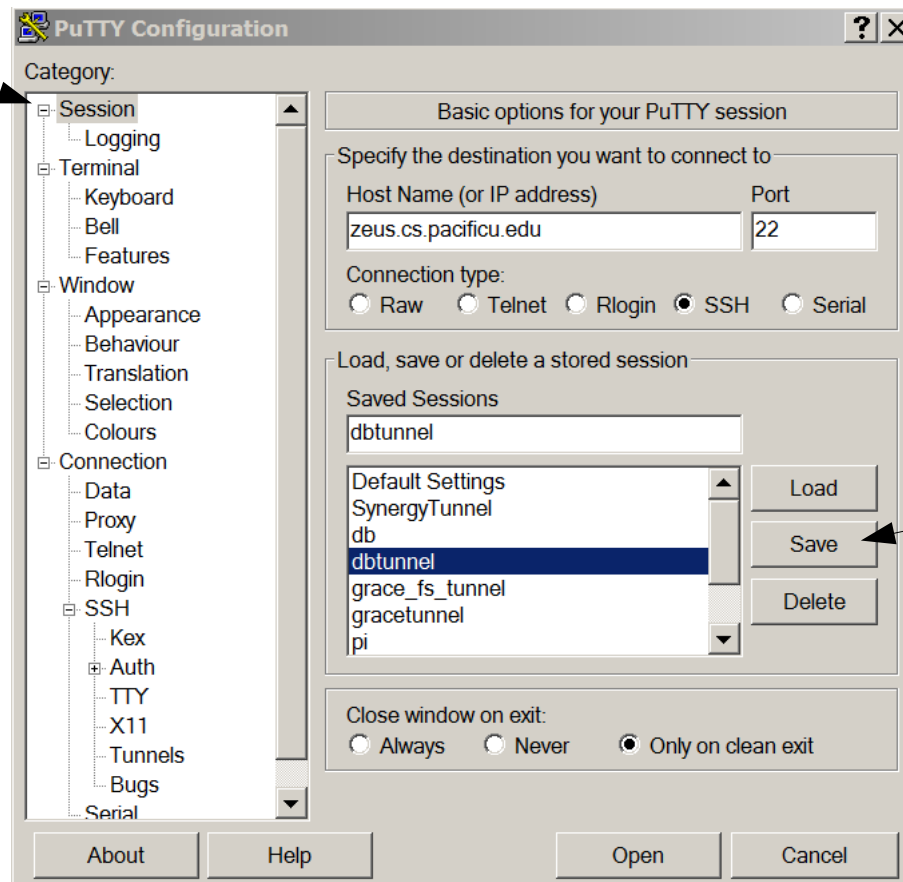

Press **Add**

- You should see this.

- Choose **Session**

Save!

- Start the tunnel via putty (login to zeus)
 - open putty
 - select dbtunnel
 - Load
 - Open
- Start dbeaver, connect to localhost, port 3306

- If you have issues with your putty connection closing after some inactivity
- Load dbtunnel
- choose Connection
- edit keepalives
- choose Session
- Save!
