

```
1 Notes Organizer Example
2
3 Live example:
4 http://64.59.233.245/php/chadd/NotesExample/firstPage.php
5
6
7 wget http://zeus.cs.pacificu.edu/chadd/cs445f17/NotesExample.tar.gz
8
9 cd /srv/www/htdocs/php/punetid/
10
11 tar xzf ~/NotesExample.tar.gz
12
13 chmod -R o+r NotesExample
14
15 # make the directory world writeable and executable
16 chmod o+xw NotesExample
17
18 # make the database file world readable/writeable (not generally a good idea)
19 chmod o+rw NotesExample/notes.sqlite3
20
21
22 Open CodeLite
23
24 File | Close Workspace
25
26
27 File | Open Workspace
28
29 /srv/www/htdocs/php/punetid/NotesExamples/NotesExample.workspace
30
31
32 No tunnels needed!
33
34 Set up Debugger
35
36 Right click NotesExample
37
38 Project Settings | Debug
39
40 Right Click in white box on right
41
42 New
43
44 local:
45 /srv/www/htdocs/php/punetid/NotesExample
46
47 remote:
48 /srv/www/htdocs/php/punetid/NotesExample
49
50 Apply | OK
51
52
53 Open Firefox:
54
55 http://localhost/php/punetid/NotesExample/firstPage.php
56
57
```

```
58  === File Listing ===
59
60  NotesExample/displayAllNotes.php -- DONE, example
61
62  NotesExample/connDB.php -- Edit with your PUNetID!
63
64  NotesExample/firstPage.php -- DONE
65  NotesExample/findAllNotes.php -- DONE
66
67  NotesExample/doWork.php -- Partial, implement View, finish New
68  NotesExample/findNoteByID.php -- Partial
69  NotesExample/findAllCourses.php -- Partial
70
71
72  NotesExample/doSaveEdit.php -- Partial but works
73  NotesExample/findCourseByID.php -- DONE
74  NotesExample/updateNoteByID.php -- Partial
75
76  NotesExample/doSave.php -- Partial
77  NotesExample/insertNote.php -- Partial
78  NotesExample/findCourseByID.php -- DONE
