

Note..

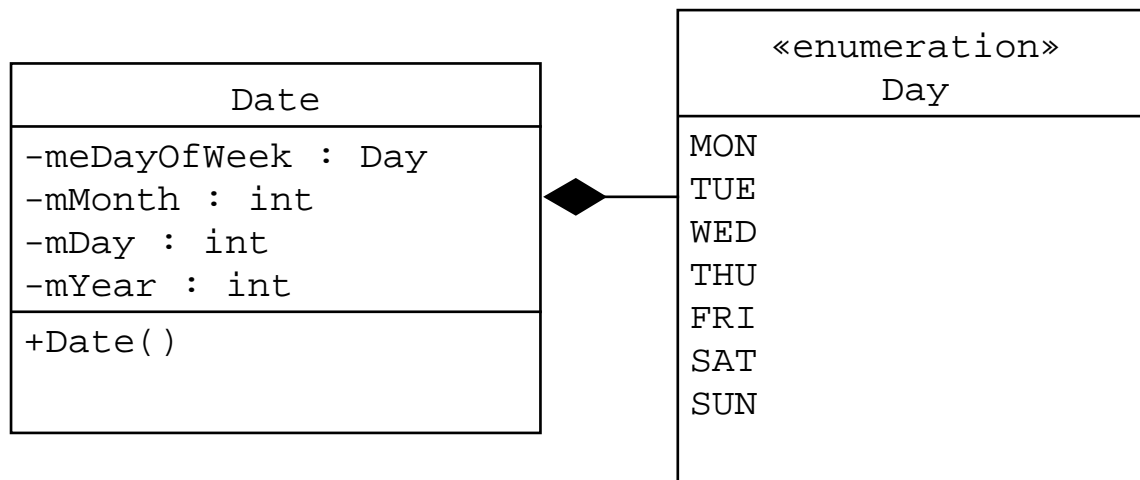

Day is an enumeration declared INSIDE of Date.

Note the name is Date::Day

The «enumeration» marks this as an enumeration instead of a class.

The normal COMPOSITION line connects Date and Day because Date contains a member variable of type Day

See that the prefix for a member variable that is of type enumeration is:  
me

Note..

Day is an enumeration declared OUTSIDE of Date.

Note the name is Day

The normal COMPOSITION line connects Date and Day because Date contains a member variable of type Day
