CS360 Final Project/Presentation

The final project is worth 15% of your overall course grade. Grading for the final project will be:

Presentation:

a) 20% of the final project grade is based on the presentation. You must be present (and on time) for ALL presentations or you will receive a zero for this portion of the final project grade.

b) Each member of the group is to present NEW material they learned to the class in a time period of 4 to 5 minutes per member. Do not go under 4 minutes and do not go over 5 minutes. This will take practice. 50% of the presentation grade will be individual and 50% of the presentation grade will be how the overall group did.

The following template will be used for grading each presentation.

			Individual	Group
__/20pts	Organization	Is material organized well? Does the presentation flow?		
__/20pts	Presentation	How well is the media used? How is the eye contact with everyone? Did you read your presentation? Are you speaking clearly & loudly?		
__/20pts	Correctness/ Explanation	Is the information presented correctly? Are the explanations clear and understandable?		
__/20pts	Effectiveness	Does the presentation connect with the audience?		
__/10pts	Professionalism	Do you look and act professionally?		
__/10pts	Demo	5 minutes are allowed for the demo		

Please read the following carefully:

1) Make sure everyone in the audience can always see what you are presenting.
2) Don't talk to any one person in the audience. Talk to the entire audience. Eye contact is very important.
3) Speak clearly and loudly enough for everyone to hear and understand.
4) Do not read your presentation to the class. Reading more than 25% of your presentation will result in a significant loss of points.
5) Develop a moderate pace. Nerves tend to dramatically speed things up. If a member's portion of the presentation is less than 4 minutes, the member will lose 10 pts per minute.

c) Each group's presentation is to use the following format:

- 5 minute introduction describing your group's project
- 5 minutes for each member's presentation of new material they worked on
- 5 minute demo of the final project
- 5 minutes for questions

Implementation:

a) 80% of the final project grade will be based on the successful implementation of your group's final project specification that you turned into me.

Presentation Day:

- We will meet in Marsh LL15 promptly at 3pm on Monday, May 17, 2010.
- You are to have everything on Turing & ready to go.
- Place presentations and code in the CS360 Drop folder BEFORE class begins. Your group's presentation and code is to be in a folder called Group# where # is your group's number from http://zeus.cs.pacificu.edu/ryand/cs360android/2010/Lectures/AndroidGroups.html . The group # will also determine the order of presentations.
- I must have a hard copy of your entire presentation and all source code prior to your presentation.
- You should practice in Marsh LL15
