CS120 Worksheet (UNIT: The Internet)   Name _____
Spring Semester 2007

1) What is the address of one of the two Domain Name Servers (DNS) that this computer is using?

2) What is the IP address of you neighbor's computer?

3) How are the two IP addresses similar?

4) You have access to a computer named euler.math.pacificu.edu. Is it on the same LAN as the computer you are using today? Why or why not?

5) Create a Word document containing your name and save it to the Desktop.

    a) Copy that file into your Documents folder on euler.

    b) Why might you want to store files on euler?

    c) Besides using this Lab, how else can you access your files on euler?

6) Open a web browser and connect to a web page you use at least once a week.

    a) What is the Top Level Domain in the web sites address?

    b) What does that Top Level Domain mean?

    c) What is the Domain Name?

    d) What is the Host Name?
