## **CS120 Worksheet** 1.8 WWW and Web Browsers, 1.9 How to get Online, and 1.10 Browser Tips and Tricks

Date: Thursday, February 15, 2007

Name:

1) What is the URL of a Web site that you visit often? What is the host name, domain name and top level domain name for this website? Does this URL contain a file name?

2) List the URLs of three hyperlinks on the website you listed above. Do these hyperlinks connect to a different Web server? Break one of the URLs down into hostname, domain name and top level domain name.

3) Find the URL of two images displayed on the website you listed. Do these hyperlinks connect to a different Web server? Break one of the URLs down into hostname, domain name and top level domain name.

4) Look online and find an ISP that provides service in Forest Grove. How much does it cost each month? What download and upload speed does the ISP advertise?
