# Loops

section 5.2, 5.4, 5.7

---

10/6/08 CS150 Introduction to Computer Science 1 1

---

---

---

---

---

---

---

---

## Loop!

---

- So far, we can
  - Get input
  - Produce output
  - Calculate
  - Conditionally execute statements

---

10/6/08 CS150 Introduction to Computer Science 1 2

---

---

---

---

---

---

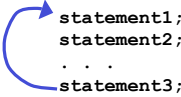

---

---

## Loops

---

- What do they do?
  - Perform the same bit of code many times

```
statement1;  
statement2;  
. . .  
statement3;
```

- Why might we want to do this?

---

10/6/08 CS150 Introduction to Computer Science 1 3

---

---

---

---

---

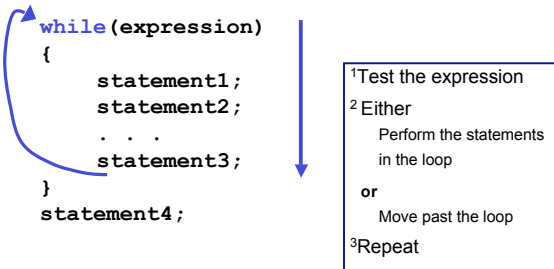

---

---

---

## While Loop (5.2)

- **while** the **expression** is **true**, loop!

10/6/08

CS150 Introduction to Computer Science 1

4

---

---

---

---

---

---

---

---

## Example: What happens?

```
int number = 0;
while(number < 5)
{
    cout << "Number : " ;
    cout << number << endl;
    cout << "Please enter a num: ";
    cin >> number;
}
cout << "The final number is: ";
cout << number << endl;
```

10/6/08

5

---

---

---

---

---

---

---

---

## Counters (5.4)

- Counter: A variable that is incremented or decremented each time a loop runs

```
int theCounter = 0;    // initialize the counter
while(theCounter < 2) // test the counter
{
    cout << "theCounter : " ;
    cout << theCounter << endl;
    theCounter += 1;   // increment the counter
}
```

- What will happen?

10/6/08

CS150 Introduction to Computer Science 1

6

---

---

---

---

---

---

---

---

## Key Ingredients of `while` loops

- Initialize
- Test
- Update (Increment/Decrement)

*If any one of these is missing or incorrect, your loop won't run properly--not at all, too many/few times or infinitely.*

10/6/08

CS150 Introduction to Computer Science 1

7

---

---

---

---

---

---

---

---

## Counters

```
int theCounter = 1;    // initialize the counter
while(theCounter < 2) // test the counter
{
    cout << "theCounter : " ;
    cout << theCounter << endl;
    theCounter += 1;    // increment the counter
}
```

- What will happen?

10/6/08

CS150 Introduction to Computer Science 1

8

---

---

---

---

---

---

---

---

## Counters

```
int theCounter = 0;    // initialize the counter
while(theCounter < 2) // test the counter
{
    theCounter += 1;    // increment the counter
    cout << "theCounter : " ;
    cout << theCounter << endl;
}
```

- What will happen?

10/6/08

CS150 Introduction to Computer Science 1

9

---

---

---

---

---

---

---

---

## Counters

```
int theCounter = 0;    // initialize the counter
while(theCounter > 2) // test the counter
{
    cout << "theCounter : " ;
    cout << theCounter << endl;
    theCounter += 1;    // increment the counter
}
```

- What will happen?

10/6/08

CS150 Introduction to Computer Science 1

10

---

---

---

---

---

---

---

---

## Practice

- Write a snippet of code that will print all the numbers from 0 to 10000 using a while loop!

10/6/08

CS150 Introduction to Computer Science 1

11

---

---

---

---

---

---

---

---

## Let the user control the Loop

- Let the user determine how many times to run the loop

```
int theCounter = 0;    // initialize the counter
int maxValue;

cout << "How many times should we run the loop? ";
cin >> maxValue;

while(                ) // test the counter
{
    cout << "theCounter : " ;
    cout << theCounter << endl;
    // increment the counter
}
```

10/6/08

CS150 Introduction to Computer Science 1

12

---

---

---

---

---

---

---

---

## Practice

- Write a snippet of code that will ask the user for a number. Print the numbers from 0 to the square of the number the user supplied.

10/6/08

CS150 Introduction to Computer Science 1

13

---

---

---

---

---

---

---

---

## Running totals (5.7)

- How many hours did you work on assignment 1?

```
int theCounter = 0;           // initialize the counter
int days;

// let the user tell us how many times to loop
cout << "How many days did you work on assignment 1? ";
cin >> days;

while(                        ) // test the counter
{

                                // increment the counter
}
```

10/6/08

CS150 Introduction to Computer Science 1

14

---

---

---

---

---

---

---

---

## Practice

- Write a snippet of code that will ask the user for a number. Print the *sum* of all the numbers from 0 to the number the user supplied.

10/6/08

CS150 Introduction to Computer Science 1

15

---

---

---

---

---

---

---

---

## Practice

---

- Write a snippet of code that will ask the user for a number. Print the sum of all the *even* numbers from 0 to the square of the number the user supplied.

10/6/08

CS150 Introduction to Computer Science 1

16

---

---

---

---

---

---

---

---

## Exercise

---

- Write a snippet of code that will ask for a student's exam score and then print the appropriate letter grade (A,B,C,D,F).
- Continue asking for exam scores and printing letter grades until the user enters a negative exam score

```
int examScore;
```
