

CS250 Final Group Presentation

On Monday, May 5, 2014, each group is to give a final 10-15 minute presentation, using PowerPoint, describing your Dark GDK Graphical Application.

Here are the specifics regarding the presentation:

1. First give a complete demo of your application (no more than 2-3 minutes) so that we can know what the application does and how it works.
2. Using PowerPoint, present the following:
 - a) Visual diagram (not code) of each class showing any class composition and class inheritance

Composition Example

Card
- Suit
- Denomination

Deck
- Array of Card

Inheritance Example

- b) How did your group decide to break up the project
- c) How did your group put the project together
- d) Each individual member of the group is to:
 - a. present the portion of the project worked on
 - b. talk about any new DarkGDK material learned
 - c. talk about the hardest part of the project
 - d. talk about the most fun part of the project
- e) As a group what would you do different
- f) Time for questions
