

# Project Portfolio

**Date Assigned:** Monday, August 30, 2010

**Date Due:** Friday, December 10, noon

**Points:** 50 points

You must print out all of the documents you have produced this semester and put them into a bound portfolio (use the binding machine in the Division office). I will return the portfolio to you at the beginning of the spring semester. Put a title page between each section.

The only **new** content in this portfolio is the title page and the introduction.

## Contents

- **Title Page**
- **Introduction**
  - Write a paragraph introducing your project. This should describe briefly the goal of your project and what problem it is trying to solve. Define the target users how they will benefit from your project. This paragraph should show your excitement for the project.
  - A second paragraph should describe how much progress you have made this semester, including which modules you have finished, and what your prognosis is for next semester.
  - A third paragraph should be a reflective paragraph discussing what you did correctly and what you did poorly this semester. Discuss ways to correct your performance for next semester and discuss how you will build on your successes.
- **Supporting Documentation**
- **Project Proposal**
- **User Requirements**
- **Development Environment & Coding Standards**
- **Project Specification & Structure Diagram**
- **Schedule**
- **Project Proposal Presentation Slides (6 to a page)**
- **Prototype Description**
- **Final Presentation Slides (6 to a page)**
- **Topic Lead Articles**
- **Status Reports**
