

CS 494 Software Engineering II

Semester Calendar

Date Assigned: Tuesday, January 27, 2015

Date Due: Tuesday, February 3, 2015

Fill out the attached calendar with all your obligations for this semester. I have started by entering some of the CS 494 obligations.

Things that you need to include:

- All of your class times
- Days/times you are working
- Exam days

Next, you need to estimate when you will complete major parts of your senior capstone. Mark those on the calendar. Give enough description so that I know what you are talking about.

The goal of this exercise is to get an accurate estimate of the time that you have available to work on this project. We can then decide if we need to scale up or scale back your project.

It is fine for you to use your own electronic calendar and print out the final version for me. This printout is from a Google calendar.

What to turn in

- A hard copy of your calendar.
