Course Evaluation

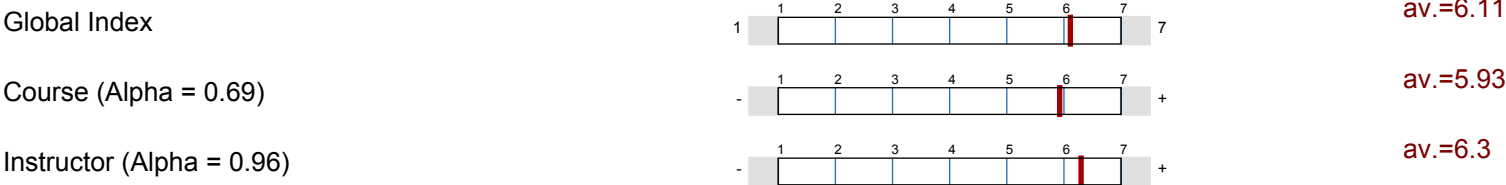

Dear Shereen Khoja,

This email contains evaluation results for CS-250-01 Intro to Computer Science II 2009S / Sp2009.

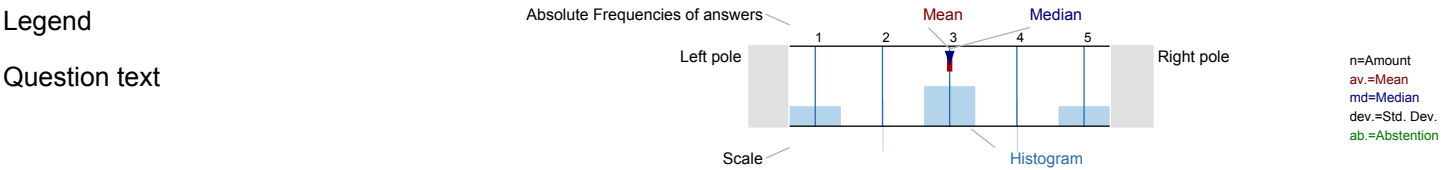

Shereen Khoja

CS-250-01 Intro to Computer Science II 2009S (CS-250-01)
No. of responses = 20

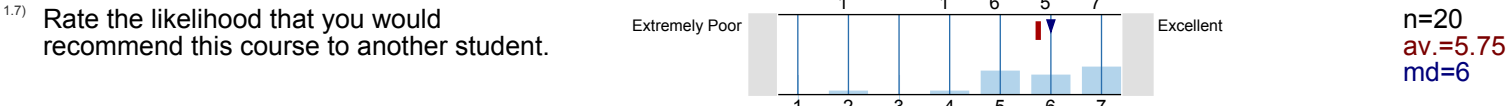

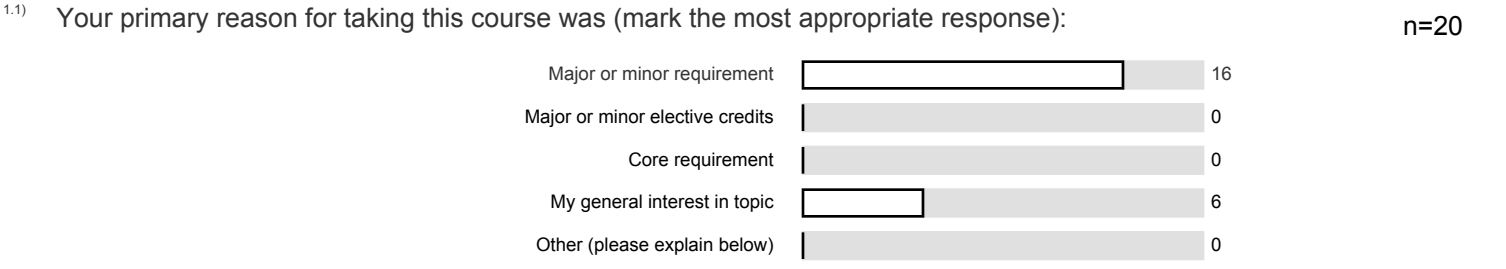

Global Values

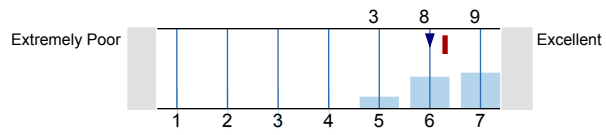

Survey Results

Course

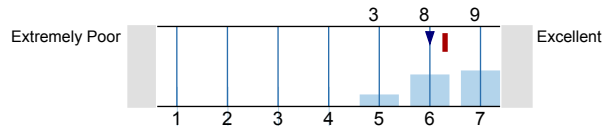

1.9) Rate your increase in skills/understanding as a result of taking this course.

n=20
av.=6.3
md=6

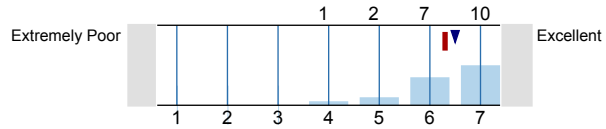

Instructor

2.1) Provide an overall rating of the instructor.

n=20
av.=6.3
md=6

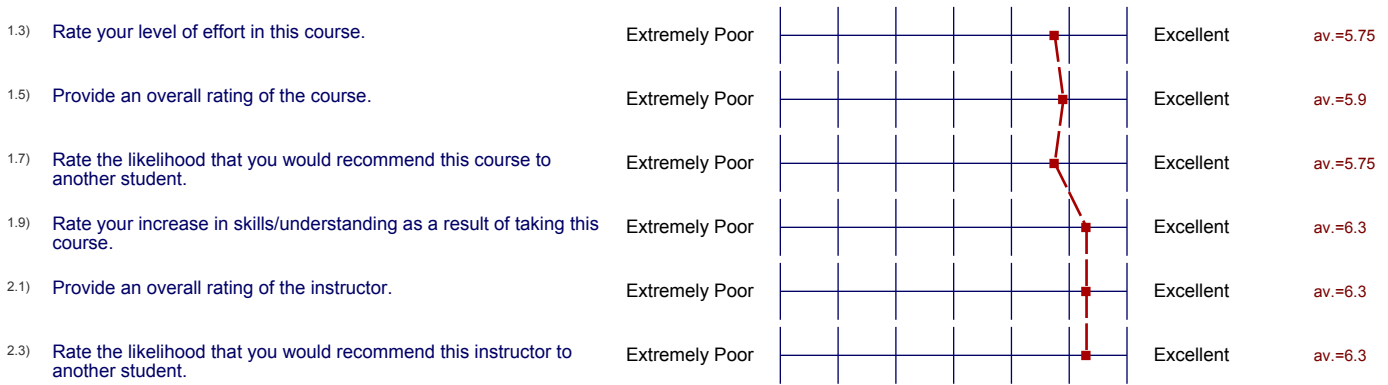

2.3) Rate the likelihood that you would recommend this instructor to another student.

n=20
av.=6.3
md=6.5

Profile

Subunit: 1 Natural Science Division
 Name of the instructor: Shereen Khoja
 Name of the course: CS-250-01 Intro to Computer Science II 2009S
 (Name of the survey)

Did not actively code outside of class (other than for projects of course)

I TURNED IN ALL THE ASSIGNMENTS COMPLETED

I listened a lot in class, but procrastinated on assignments

only missed class once, always prepared.

I could've studied harder.

I tried hard to understandsm and went in for help, but I didn't study as much as I should have.

I attended all classes, did all work, started work mostly early and participated.

I turn in all of my assignments on time and complete them to the best of my ability; however, I remain uncommitted when it comes to studying for tests.

1.6) Overall Rating Explanation:

[Empty text area for explanation]

The only thing I would add is a few more weeks without having to do back to back projects.

[Empty text area for explanation]

GREAT CONTENT. BUT CODING STANDARDS WORTH 30% IS BULLSH*T

I ♥ coding

Fun course. I learned a lot of new material and also practiced old stuff.

Sometimes the jump from smaller assignments to larger was still a bit much.

It's so much more difficult than I expected and I don't think I'm as confident in computer science as I was in the beginning.

CS250 ~~was~~ was a big jump from CS150 and I wasn't ready for it.
^{I felt like}

Really fun, interesting material, would have liked having lab time though.

The course is exactly what ~~is~~ should be and has provided me with a great understanding of the basics of computer science (and some non-basic things as well).

1.8) Likelihood Explanation:

Only if they were interested in the subject

You have to be a math or computer science inclined person to enjoy this class, and many people are not.

It was alot better than 150, I felt like we're finally starting to get some where

IF THEY LIKE CS, THEY SHOULD

see above

CS IS AWESOME

For a 200-level class, this class was extremely difficult. Why would I recommend somebody else suffer through it. The only reason I got through it was Shereen.

I really enjoyed all of the projects. It was the tests that were difficult.

~~It~~ If you enjoy CS programming, yes, and if you are willing to spend countless hours studying and doing programming assignments.

I really enjoy the subject, its interesting to learn about and Shereen makes it interactive

Its a cool course.

1.10) Skills/understanding Explanation:

All of these topics were brand new to me.

GREAT CONTENT

Some concepts were harder to grasp quickly, but I just kept practicing until I understood it.

I know so many more awesome things now; it's basically insane ridiculous.

I learned so much throughout this entire course.

I've learned a lot, but it took awhile to grasp most of the concepts.

I came into this course from CS150 only knowing what I had learned in that class, not great w/ computers, everything was new.

learned a lot more to add onto my CS150 knowledge.

2.2) Instructor Rating Explanation:

Very good. Wish there were more office hours.

Shereen does an excellent job teaching a very difficult topic.

Extremely intelligent and challenging without being unrealistically difficult.

Slightly quick to jump to a solution to a problem without allowing student to fully explain question

She's an amazing teacher & is really helpful when you go see her.

SHEREEN IS CLEAR ORGANIZED & HAS A SWEET ACCENT

Always willing to help, goes out of her way to make sure someone understands.

Asked students questions in class which is good.

Always helpful and available

She's the very best at what she does.

Made time for students - office hours flexible

Interactive with class and gets everyone involved in the lecture.

good professor but I am not a fan of her teaching style she acts as if we are fifth graders and she'll ask questions to people who aren't paying attention (slows things up)

she is friendly and interactive and will always find time to help you out when you are confused.

2.5) Please provide any additional comments that you want to make about the course and instructor.

The course goes fast, so you can't miss a day. Our prof is really good & she's really welcoming if you go see her. However I feel she could do a better job conveying that her door is open. I was really nervous the first time I walked in her door. But once you are there she's amazing.

interesting class, fun assignments
No major complaints.

This class was fun, and actually reinforced my belief that I'd made the right choice in my major

It would have been nice to have lab like CS150 to be able to incorporate topics into programming more than just on the assignments.
