

For Friday

- Go to github.com and get an account
 - you can use an existing account
- On your VM:
 - Set up SSH keys.
 - at the terminal:

```
ssh-keygen -t ed25519 -C "punetid@pacificu.edu"
```

Accept all defaults. Two files are created:

```
~/.ssh/id_ed25519      your private key  
~/.ssh/id_ed25519.pub your public key
```
