For each DFA/NFA build a machine using JFLAP. Save the machine to a file named:
Hmwk3_#_%_PUNetID.jff where # is the 1.# and % is the subquestion letter. Zip (or tar) these files
together into one large file named Hmwk2_PUNetID.zip (or .tar) and email that one large file to me.
For any question that requires a text answer, type up the solution and turn it in.
