Run Close			
CS 480 – Spring 2009 Pacific University			

Run Binary (take two)

CS 480 – Spring 2009 Pacific University

Printing

- Windows | Preferences
- General | Appearance | Colors and Fonts
- C/C++ | Editor | C/C++ Editor Text Font
 Use Courier 10 Pitch, Size 8
- This changes the font on the screen!
 You may want to change back after printing
- Print doubled sided!

Create SVN Repository

zeus\$ svnadmin create /home/login/SVNREPOS/

Run once on Zeus.

If you have an different repository name (SVNREPOS), email it to me!

Never touch SVNREPOS again.

Subversion: add to repository

- SVN
- Create New OR
- Use Existing
- Use Project name as folder name

Subversion: Commit Files

- Team | Commit
- What do I commit?
 - Source files
 - Makefiles
 - .cproject / .project
 - Test files
- What do I *not* commit?
 - *.0
 - Binaries
 - Temporary files

Subversion: Update from Repos

- Team | Update
- Team | Synchronize with Repository
 Shows how files differ from repos
- Revert from bad code
 - Team | Show History
 - "Revert changes from revision ###"
- Team | Compare With
- Team | Replace With

Revert One File

- Team | Replace With | Revision
- Copy All Non-Conflicting Changes from Right to Left
- Right click on Workspace File Pane | Save
- Next commit will save the changes to a new revision in the repository

Revert the Entire Project

- Rename existing Project
- Right click Project Name | Rename
- Don't worry, from Eclipse, you cannot destroy your SVN Repository

– Unless you really, really try

Revert the Entire Project

- Check out New Project from SVN
- Don't check out the HEAD
- Select Revision

Check Out As	SV
Select the meth	iod of check out and the revision to check out.
Choose how to	check out folder HowDolRevert
O Check out a	s a project configured using the New Project Wizard
(Only available v	when the .project file does not exist in the repository)
Check out a	s a project in the workspace
Project Name:	HowDolRevert
🗌 Check out H	IEAD revision
Povision:	Salact
Depth: Fully r	ecursive 🗢
🗌 Ignore exte	rnals
✓ Allow unvertex	rsioned obstructions

			CS 480 — Spring 2009
•			Pacific University

Both Projects

- Project checked out twice
- Different revisions in each project

Delete Old Project

- Not strictly necessary
- Right click on (Old) Project Name | Delete

🔙 – 🛤 D o	elete Resources	80 🗆 🗙
?	Are you sure you want to delete 'HowDolRevert' from the file system?	
	elete project contents on disk (cannot be undone)	
	Previe <u>w</u> > OK Car	ncel

- Make sure you delete Project from disk
 Does not affect Subversion repository
- Close Eclipse and restart
 - To clean up the workspace

CS 480 – Spring 2009 Pacific University

Reverted Project: Commit new Changes

- Update code in project
- Right click Project Name | Team | Synchronize with Repository
- Right click Project Name | Mark as merged
- Go back to C/C++ Perspective
- Right click {File,Project} | Team | Commit

Merge Conflict!

• Changes in the Repository conflict with changes in your local directory

CS 480 – Spring 2009 Pacific University

Resolve!

- Edit the source file main.c
 - Remove <<<< >>>>
- Right Click File | Team | Mark Resolved
- Commit

Subversion: Check out

- File | New | Project | SVN | Checkout projects from SVN
- Create new:

svn+ssh://zeus/home/login/SVNROOT/CS480_0

- login: your zeus login
- CS480_0: project in repository

Subversion: Check out by hand

zeus\$ svn co svn+ssh://zeus/home/*login*/SVNROOT/CS480_0 CS480_0

- *login*: your zeus login
- CS480 0: project in repository
- CS480_0: local directory to create

GCC (compiler)

- gcc -o *example.o* -c *example.c*
 - -o output file
 - c compile only (produce .o file)
- gcc -o example example.o
 - Use *example.o* to build executable file *example*
 - Run *example*:
 - zeus\$./example
- -g : add debug symbols
- -Wall : show all warnings

GCC (extras)

- gcc --help
- gcc -S -o *file.asm file.c* dump assembly instructions to file.asm
- gcc -lm *file.c* -o *file*
 - Link against math library (libm.so)
 - Link against library libabc.so: -labc
 - Produce executable *file*

Makefile

- # Sample makefile # comment
- CC=gcc # variable
- CFLAGS=-g -Wall
- all: driver # default target

```
driver: driver.o
    ${CC} ${CFLAGS} -o driver driver.o
driver.o: constants.h driver.c
    ${CC} ${CFLAGS} -o driver.o -c driver.c
clean:
```

rm -f core *.o *~

Makefiles

- See makeex1.tar.gz and makeex2.tar.gz
- Example 2 shows directories being used

Valgrind.org

- http://valgrind.org/docs/manual/QuickStart.html
- Memcheck
 - Memory checker
- To run:

zeus\$ valgrind --leak-check=yes ./CS480_0 10

- Look for
 - invalid read/writes
 - uninitialized values
 - illegal frees
 - and more....

Linux Command Line

- ssh connect to a remote machine
- scp copy file to/from remote machine
- cd change directory
- ls list files
- man manual pages
- mkdir make a directory
- cp copy a file
- tar zxf filename.tar.gz explode files

CS 480 – Spring 2009 Pacific University

Linux Command Line

- rm remove a file
- mv move (rename) a file
- more display a file
- ps list processes
- grep search for text in a file
- diff compare two file
- kill kill a process
- passwd change password (on ada)
